PROFESSIONAL SUMMARY

Frontend-first web developer focused on building and improving clean, maintainable web applications, responsive websites, MVPs, dashboards, and user-facing interfaces with React, TypeScript, JavaScript, and Firebase.

Practical independent-project experience tracing state, data, and user flows, maintaining existing code, implementing clearly scoped features, and validating changes through user-flow testing, lint/build checks, deployment, documentation, and handoff.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS, Tailwind CSS, Bootstrap, styled-components

State & Routing: Context + reducer, React Context, Redux Toolkit, React Router, localStorage

Backend / Cloud: Firebase Auth, Firestore, Cloud Functions v2, Firebase Hosting

Tools: Vite, Git, GitHub, GitHub Actions, Vercel, Cloudinary, Figma for UI review and design handoff

Delivery / UX: Responsive UI, mobile-first layouts, dashboard and CRUD flows, forms and validation, frontend debugging, maintenance, user-flow testing, lint/build checks, deployment, documentation, and handoff

SELECTED PROJECTS

LifeRecompiled - React/Firebase Engineering Case Study

Tech: React, Vite, Firebase Auth, Firestore, Cloud Functions v2, Tailwind CSS, Firebase Hosting, GitHub Actions

- Built a production-style React/Firebase engineering case study around a community/blog app surface, focused on authentication, protected routes, Firestore data modeling, Cloud Functions, and practical UX edge cases.
- Implemented core app flows including posts, comments, reactions, saved posts, profiles, dashboards, moderation/reporting surfaces, and soft-delete/restore behavior.
- Designed backend-maintained logic using Cloud Functions v2, deterministic reaction documents, aggregate counters, scheduled cleanup, privileged deletion flows, and resilient fallback UI.

Training App - Mobile-first Structured Training System

Tech: React, Vite, React Router, Tailwind CSS, Context + reducer, localStorage, Firebase Hosting, GitHub Actions

- Designed and built a mobile-first structured training system combining Bulk/Cut plans, workout targets, contextual guidance, logging, previous values, and next-step context in one clear workout flow.
- Created cycle-based progression with RIR, tempo, rest, exercise cues, progression rules, partial-day support, and a stable workout order that continues when real-life schedules change.
- Implemented route-based flows, Context + reducer state, and a dedicated localStorage persistence layer separating static training content from user progress across workouts and cycles.

TaskFlow - React + TypeScript Kanban Board

Tech: React, TypeScript, Context API, styled-components, drag-and-drop, localStorage, Vercel

- Built a polished React + TypeScript Kanban board with drag-and-drop lists/cards, responsive layout, localStorage persistence, custom hooks, and Vercel deployment.
- Implemented typed props, board-data interfaces, React Context typing, generic `useLocalStorage<T>`, typed refs/events, reusable reorder helpers, and immutable nested state updates.

PROFESSIONAL EXPERIENCE

Frontend Developer - Independent Projects

React, TypeScript, JavaScript & Firebase

Dec 2024 - Present

- Built and refined independent JavaScript, React, TypeScript, and Firebase projects focused on responsive UI, maintainable frontend structure, practical product workflows, routing, state management, persistence, documentation, and deployment.
- Diagnosed frontend issues across project code, traced affected state and data flows, implemented contained fixes and features, and verified changes with user-flow checks, lint/build validation, and documented limitations.

Operations / Location Manager

Star Bet / RM-Company, Kragujevac, Serbia

Sep 2020 - Jun 2026

- Progressed from retail operator to location-level management, coordinating daily operations across multiple local branches.
- Managed schedules, shift organization, staff coordination, operational procedures, and issue handling in a high-responsibility customer-facing environment.

IT Support / Network Administration Assistant

Zastava Kamioni / Zastava TERVO, Kragujevac, Serbia

Feb 2017 - Mar 2018

- Supported internal computers, network equipment, and basic server/workstation setup for company operations.
- Worked with electronic data processing tasks, including payroll-related records, product structure data, and material calculation documentation.

EDUCATION & TRAINING

IT Akademija Himera, Kragujevac

Front-End Web Development

2022 - 2024

- Completed structured training in HTML, CSS, JavaScript, and React.
- Completed TypeScript fundamentals through guided React + TypeScript project work, then continued practical learning through React/Firebase applications, deployment workflows, documentation, and frontend architecture practice.

LANGUAGES

Serbian: Native / Bilingual

English: Conversational
